mine@stat.duke.edu 

Tips for success / less frustration

- R Markdown:
 - Knit early and often
 - Early exit (in code chunk or inline) — `knitr::knit_exit()`
- Shiny:
 - Run app early and often (yes, even though it might take some time)
 - Watch for commas and () with reactive expressions

Follow up

- Drill down lists: <http://shiny.rstudio.com/gallery/superzip-example.html> (Data explorer tab)
- Code at <https://github.com/rstudio/shiny-examples/tree/master/063-superzip-example>
- Post to RStudio Community?
 - Bibliography in order of appearance (as opposed to alphabetical)
 - `callr` package error when deploying to shinyapps.io
