Tips for success / less frustration

- R Markdown:

  - Knit early and often

  - Early exit (in code chunk or inline) — knitr::knit_exit()

- Shiny:

  - Run app early and often (yes, even though it might take some time)

  - Watch for commas and () with reactive expressions

Follow up

- Drill down lists: http://shiny.rstudio.com/gallery/superzip-example.html (Data explorer tab)

  - Code at https://github.com/rstudio/shiny-examples/tree/master/063-superzip-example
